# PLA190 19 Inch Rack Adapter
Accessories

Description

The PLA190 Rack Adapter converts any 35 series model PowerLab system* into a 19 inch × 2 Units high (3.5 inch) rack mountable enclosure. Power is controllable through a front panel switch.

Assembly

Remove the two screws holding the saddle bracket. Place the PowerLab into the chassis and push it through the front panel of the rack adapter. Push firmly until the rear of the PowerLab sits down flat. Replace the saddle bracket. Connect the PowerLab power socket to the rear of the rack adapter using the cable supplied. Connect the rack adapter to a power outlet.

Warning: The Rack Adapter must be supported in a rack using support rails.

Push PowerLab forward firmly until it fits down behind this rear flange.

Saddle bracket
